

AJAYI BRIGHT OLUWATOSIN

FULL-STACK DEVELOPER · React · Node.js · C# · ASP.NET Core · JavaScript
Brightajayi20@gmail.com | +234 703 714 9367 | github.com/brite222 | linkedin.com/in/ajayi-bright
Lagos, Nigeria

PROFESSIONAL SUMMARY

Full-Stack Developer with **3+ years** of hands-on experience designing and shipping production-grade web applications. Proficient in **React, JavaScript, Node.js, HTML/CSS** on the frontend and **C#, ASP.NET Core 8, Express.js** on the backend. Experienced across the full development lifecycle — RESTful API architecture, relational database design, responsive UI development, and containerised deployments with Docker. Currently building **Zuriflux**, a civic-tech waste management platform serving Lagos. Passionate about clean, SOLID-compliant code that solves real-world problems and delivers measurable results.

WORK EXPERIENCE

Full-Stack Developer — Contract & Freelance Self-Employed | Remote

January 2022 – Present

- Designed and delivered full-stack web applications for clients in e-commerce, logistics, and fintech using **React, Node.js, C#, and ASP.NET Core**.
- Architected RESTful APIs with **ASP.NET Core 8** consumed by React frontends, implementing **JWT authentication**, role-based access control, and refresh token flows.
- Built responsive, mobile-first UIs with **React** and vanilla **HTML/CSS/JavaScript**, consistently achieving Lighthouse performance scores above 90.
- Designed and optimised **SQL Server** and **PostgreSQL** schemas; wrote T-SQL stored procedures that reduced query latency by **~35%**.
- Containerised backend services using **Docker** for consistent staging and production deployments.
- Integrated third-party APIs (payment gateways, SMS, mapping) with robust error-handling and retry logic for reliable data pipelines.
- Maintained codebases with **Git/GitHub** feature-branch workflows; wrote **xUnit** and **Jest** tests ensuring regression-free releases.

Junior Web Developer — Personal & Open Source Projects Independent | Lagos, Nigeria

June 2021 – December 2021

- Built and deployed multiple full-stack projects: a community forum, a task management dashboard, and a product landing page suite.
- Developed interactive SPAs with **React hooks**, **Context API**, and **React Router** for dynamic client-side navigation.
- Created **C# / ASP.NET Core** and **Node.js/Express.js** backends with both **SQL Server** and **MongoDB** data stores.
- Implemented complete authentication flows using **JWT** and **bcrypt**: registration, login, email verification, and password reset.
- Applied responsive design principles using **CSS Flexbox**, **Grid**, and media queries for cross-device compatibility.

PROJECTS

Zuriflux — Civic-Tech Waste Collection Platform

(In Progress) · C# · ASP.NET Core · React · SQL Server · Docker

- Leading full-stack development of a civic platform improving waste collection and sanitation across Lagos.
- Built a **React** dashboard for agents to view assignments, update statuses, and track routes in real time.
- Designed RESTful APIs in **C# / ASP.NET Core** to manage collection schedules, pickup requests, and zone assignments.
- Architected a normalised relational database schema tracking agents, districts, requests, and audit logs.
- Implemented **C#** background services for automated scheduling and real-time notification dispatch.

ShopEase — Full-Stack E-Commerce Platform

React · Node.js · Express.js · MongoDB · JWT · CSS3

- Built a complete online store with product listings, cart, checkout flow, and order history.

TECHNICAL SKILLS

Languages

C# · JavaScript (ES6+) · HTML5 · CSS3 · SQL

Frontend

React · Context API · React Router · Chart.js · Responsive Design

Backend

ASP.NET Core 8 · Node.js · Express.js · ADO.NET · Entity Framework Core

Databases

SQL Server · PostgreSQL · MongoDB · T-SQL · Query Optimisation · Data Modelling

API & Auth

RESTful API Design · JWT · OAuth2 · Postman · Swagger/OpenAPI · Socket.io

DevOps

Git · GitHub · Docker · VS Code · Visual Studio · CI/CD basics

Testing

xUnit · Jest · Debugging · Integration Testing

Methods

Agile/Scrum · SOLID · Clean Architecture · MVC · DRY

EDUCATION

B.Sc. Mathematics

Federal University Oye-Ekiti
2019 – 2024

CERTIFICATIONS

- Microsoft Learn – C# Fundamentals
- freeCodeCamp – Responsive Web Design
- Udemy – ASP.NET Core Web API
- LinkedIn Learning – SQL Server Essentials
- freeCodeCamp – JavaScript Algorithms

KEY STRENGTHS

- Full-stack problem solving
- Clean, readable code
- Fast learner & self-starter
- Strong attention to detail
- Remote-work ready
- Team collaboration

ADDITIONAL INFO

- Open to remote & hybrid roles
- Available for immediate start
- Strong written & verbal communication
- Lagos, Nigeria (WAT, UTC+1)

- Implemented secure **JWT authentication** with role-based access control for customers and admins.
- Designed a **React** storefront with search, filter, and pagination using **Context API** state management.
- Built an admin dashboard for inventory management, order tracking, and sales analytics.
- Integrated a third-party payment API for secure, seamless checkout experiences.

AdminPulse — Analytics & Admin Dashboard

[React](#) · [C#](#) · [ASP.NET Core](#) · [Chart.js](#) · [PostgreSQL](#)

- Designed a data-rich admin dashboard with real-time **Chart.js** charts, KPI cards, and activity logs.
- Built reusable **React** components for data tables, modals, and form inputs with full validation.
- Developed a **C# / ASP.NET Core** backend exposing paginated, filterable API endpoints for large datasets.
- Implemented role-based access (Admin, Manager, Viewer) with protected route handling on both layers.

ConnectHub — Social Community Platform

[React](#) · [Node.js](#) · [MongoDB](#) · [Socket.io](#) · [JWT](#)

- Built a community platform with profiles, post feeds, comments, likes, and a follow system.
- Integrated **Socket.io** for real-time notifications and live comment updates without page refresh.
- Implemented full auth flow: registration, login, email verification, and password reset.
- Designed a responsive, mobile-first UI with smooth transitions and skeleton loading states.

Trading Firm Web Application

[C#](#) · [ASP.NET Core 8](#) · [React](#) · [SQL Server](#) · [Docker](#)

- Built 12+ RESTful API endpoints in **C#** for authentication, trade order management, and live price feeds.
- Designed a layered backend (Controller → Service → Repository) for testability and clean separation.
- Wrote optimised stored procedures for order history queries, cutting data retrieval latency by **~35%**.
- Developed a **React** frontend with real-time price display and trade order submission form.

API-Based Data Retrieval System

[C#](#) · [ASP.NET Core](#) · [SQL Server](#) · [IHostedService](#)

- Built a scheduled **C# IHostedService** background job to poll external APIs and persist data to SQL Server.
- Implemented response caching that reduced redundant API calls by **60%**, lowering latency and costs.
- Designed a normalised schema with indexed columns, improving complex JOIN performance by **over 40%**.

Personal Portfolio Website

[HTML5](#) · [CSS3](#) · [JavaScript](#) · [Responsive Design](#)

- Built a fully responsive portfolio showcasing projects, skills, and contact info with scroll animations.
- Achieved a **95+ Lighthouse performance score** through optimised assets and semantic HTML structure.
